

# TROY SMITH

## STUDIO

FUNCTIONAL ART

Troy Smith's work is custom-made to your specifications. You will see many different materials and finishes in the lookbook. Most of the work you see has options for finishes, colours and size, and we can often make changes to fit your project's needs. Let us know if you would like to supply your own fabric.

We are here to offer expert advice on design decisions in making the right choices for the success of your project.

Our goal is to build the highest quality functional art.

TROY SMITH STUDIO

## Troy Smith

### A Material Man

---

Troy Smith is a Canadian artist, designer, sculptor and painter whose extraordinary art has garnered international attention. From notable galleries, private collectors, interior designers, architects and individuals who covet and curate innovative contemporary art.

Using furniture to express his creativity, Smith's eclectic collection of works embodies meticulous craftsmanship and exceptional beauty.

Troy epitomizes the definition of a modern-day Renaissance man, expressing his passion for all things beautiful. He travels extensively to international design and fashion capitals. He regularly visits world-famous museums, galleries and architectural landmarks to explore and experience emerging trends of iconic creations in art and design. These influences are a constant source of inspiration and apparent in Smith's furniture, abstract paintings and sculpture.

Smith's art is a rare and remarkable fusion of enduring materials, some dating back to the fifteenth century, such as patterned rebar. His original one-of-kind and limited edition pieces imaginatively integrate inspired elements such as marble, stone, precious metals, exotic woods, artisan glass, textiles, resins and luxurious leathers in unexpected ways.

His passion for all things beautiful ensures each piece is a work of art and embodies extraordinary inspiration, meticulous craftsmanship and outstanding beauty. Smith's works are born from creativity, exhaustive research, planning and often mind-bending engineering techniques. He is intimately involved with a hands-on approach throughout each piece's evolution to realize his vision.

# LOOKING GLASS CABINET

## One Of A Kind

---

Smith is continuously experimenting with new design concepts, materials, techniques and structures in his pursuit to create unique and sublime art forms. His original works of art are a rare and remarkable fusion of enduring and timeless materials by imaginatively integrating elements such as textured rebar, glass, textiles and exotic woods in unexpected ways. He's innovated with a light-shifting glass and created many unique works that exhibit humour with contemporary forms.

Troy's creative process begins with hand-drawn conceptual sketches, transferred to professional shop drawings and then rendered in 3D to refine each designs form, material, function and intricacies. Troy uses artisan craftsmanship and luxury materials to develop proportion, scale and finish in an original design language.

Curators, designers and private clients may commission one-of-a-kind pieces. Troy's furniture has been referred to as avant-garde, visionary and classic. There is intrinsic power in its simplicity, clean lines and fluidity, which is why Smith's exquisite statement pieces are destined to become design classics. His art has been featured in international design shows, prestigious exhibitions and prominent design magazines.

Each piece Troy creates fulfills his mantra, "You can't just create art, you must give it life."

# The Rebar Collection

---

Rebar, also known as a reinforcing bar, is a steel bar used as a tension device to strengthen concrete and masonry structures. The rebar's surface is ribbed, which adheres to poured concrete. In its raw form, rebar is aesthetically unremarkable.

Troy's inspiration for developing his Rebar collection came from working alongside his father as a young protege in the family home-building business. He was fascinated by the industrial materials used on the job and re-imagined rebar into art. His creativity has given new expression and functionality to this primary building material through his evocative designs.

In his rebar collection, the rebar is heated with torches and red-hot forges, skillfully sculpted by hand and machines. During assemblage, the rebar is integrated with other high-end design elements, such as marble, wood, metal, upholstery and glass, ensuring the integrity and interpretation of the original design.

Smith's creativity has given new meaning, expression and functionality to rebar and other materials through his diverse design forms, structures, and detail.

Troy is intimately involved and has a hands-on approach throughout each piece's evolution to realize his vision.
